

Clasificación:	004.35 R274
Autor:	Raynal, Michel
Título:	Concurrent programming : algorithms, principles, and foundations
Pie imprenta:	New York : Springer, 2013.
Descripción:	ix, 515 p.
Contenido:	Part I. Lock-based synchronization; Part II. On the foundations side: the atomicity concept; Part III. Mutex-free synchronization; Part IV. The transactional memory approach; Part V. On the foundations side: from safe bits to atomic registers; Part VI. On the foundations side: the computability power of concurrent objects (consensus).
Materias:	PROGRAMACION (COMPUTADORES ELECTRONICOS) -- MANUALES ALGORITMOS COMPUTACIONALES
ISBN:	9783642320262
Ubicación:	Biblioteca Ximena Sánchez S., Macul.
